BUILDING FUTURES

with Coventry Homes

Building Futures Handbook

Safety

Please recognize that there is inherent risk with participating in this program as students are actively working on the job site in collaboration with Coventry Homes. Safety processes for participating in this program are outlined in the [Parkland School Division Occupational Health & Safety Manual](#).

All students will complete CSTS (Construction Safety Training System) during the first week of school. WHMIS training is also contained inside of this course.

All students will complete HCS 3000 after going through CSTS as another course on safety.

Students all receive skill specific training prior to participating in different stages of the build.
